SUMMARY

Dynamic and driven computer science student with a strong skill sets in backend development, seeking internships or jobs to further enhance my abilities. Proficient in Java, understanding of frameworks like Spring, Springboot. Collaborative by nature, excel in problem-solving, decision making and interpersonal skills. Eager to showcase my knowledge and contribute to real-world projects, seeking a challenging role that allows me to leverage my development skills and contribute to the success of the organization.

EDUCATION

Bachelor of Technology, 69.3% <i>Inderprastha Engineering College</i>	2020 - 2024
Intermediate, 78.3% <i>Dav Public School</i>	2019 - 2020
High School, 78.4% <i>St Thomas School</i>	2017 - 2018

TECHNICAL SKILLS

Core Skills: Java, SpringBoot(MVC), Hibernate, Jpa, J2EE

Database: MySQL

IDEs: IntelliJ, VS Code

Personal Skills Communication, Leadership, Teamwork, Time Management & Flexibility

WORK EXPERIENCE

Java Developer

Internpe

April, 2024- May, 2024

- Engineered as a Java Backend Developer.
- Used the technologies like Spring Boot and Hibernate/Jpa to store the data.
- Implement multiple tasks and create RESTAPI's to gain Hands-on experience.

PROJECTS

CricInformer

Technology - Java, Springboot(MVC), Jpa/Hibernate, j2EE

- Implemented a backend system to dynamically display real-time updates for ongoing live cricket matches.
- Leveraged **web scraping** techniques to extract live cricket scores from cricket website.
- Developed **RESTful API's** to fetch and save the data for the ongoing and completed matches.
- Utilized Spring JDBC to efficiently store completed cricket matches in a MySQL database, facilitating seamless retrieval for future reference.

Cafe Management System

Technology - Java, Springboot(MVC), Jpa/Hibernate, j2EE

- A cafe management application helps to manage various operation of a cafe. It can be used to manage customer and orders, payments and generate order bills.
- Developed a cafe management application that allow user to create, read, update, delete the order items.
- Implemented web tokens for secure user authentication and authorization
- User can register, login and manage their order securely.
- Designed and implemented the database schema and models for menu items and user management.

CERTIFICATIONS

- Oracle Database Foundation
- Java Summer Inhouse Internship
